THE WOOD INDUSTRY IN REVIEW

PRODUCTION

The year under review relative to the year previous, showed the industry's declining performance in volume production of major wood products: -10% in logs, -16% lumber, and -20% plywood. A +13% increase in veneer production, however, was registered. (See Comparative Statistical Highlights for production).

This reflected operational problems encountered by the sector during the year that mainly revolved around the increasing difficulty of accessing timber resources. As there was a 25% decline in the number of TLA operators, there was also a decrease in the volume of allowable cut and a concomitant 10% decrease in timber production.

MARKET

The year 1988 was a good year for the country, which posted an overall GNP growth of +7.6%. However, the wood industry, together with the food and agriculture sectors registered a growth of only 3.13%.

Wood product exports totaled US\$264 million against US\$246 million in 1987 despite a 1% decline in volume of export. The increase of 7% in export revenue was mainly attributed to the upward price improvement in the international market.

By commodity, lumber posted -3% growth in volume and +1% in value; plywood -2% in volume and +16% in value; and veneer +23% in volume and +42% in value. The average export price of falcateria logs dropped by 4%; lumber, plywood, and veneer posted increases of 5%, 18% and 19%, respectively relative to their 1987 levels.

Taiwan and Japan were leading markets for local falcateria logs, absorbing 88% and 7% respectively of export volume. Japan got 34% of total lumber export volume, United Kingdom, 28% and USA, 8%. USA obtained 52% of veneer export volume, Japan, 25% and Australia, 12%. Of the local plywood, Hong Kong, got 35% of export volume, by United Kingdom, 17% and USA, 11%.

The local wood processors milled 95% of the total log production. Of the total output, the domestic consumers absorbed 39% of total lumber production, 41% of total plywood production and 7% of total veneer production, the rest being exported.

MAJOR ISSUES FACED

What seemed to augur well for a much expected recovery of the local industry, with the encouraging turnaround in export prices of timber products, was beclouded by the deepening issue of environmental concern. The Church, Congress, non-government organizations (NGOs), etc. battling for forest conservation, have advocated logging ban and other forms of restrictions on local wood industry.

In Congress are pending legislations for a total or partial logging ban. Regulations of logging operations, such as one logging side at a time, prohibition in the use of highlead yarders, drastic reduction of annual allowable cut under a new formula, prohibition of transporting legally-sourced undersized logs, moratorium on logging operations in Agusan and Samar provinces, etc. were imposed by DENR.

Critical, however, had been the suspension and or cancellation of TLA operations that reduced by 25% the number of operational TLAs by the end of year. Thus, because of the reduction or interruption in available raw material supply, local prices of timber products increased by an average of 20% by the end of the year.

How major issues were addressed by the Association are elsewhere here summarized.

THE ASSOCIATION

PWPA campaigned hard to offset the impact of governmental measures on the wood industry. The Association attended and argued the case of the wood industry before Congressional hearings, especially on the proposed selective or logging ban. The Association also maintained its close relationship with the DENR in matters of policies and regulations seriously affecting the wood industry.

A significant stride between DENR and PWPA relationship was the formation of the Reforestation Trust Fund Program. Under this Program, TLA holders are to deposit P10,000, for every hectare of forest to be logged, to be used to reforest open and denuded areas as well as to improve logged-over timber stands. The PWPA

ACCOMPLISHMENT HIGHLIGHTS

Issues	Position taken by PWPA	Status
1. Clarification on Reforestation Trust Fund	PWPA Proposals:	DENR decided that :
a. TLA holder with no open/denuded areas	a) TLA should be exempted if no open/denuded areas	a) DENR will locate areas outside of TLA
b. Effectivity of reforestation deposit	b) 4th quarter, 1988	b) September, 1988
c. Effectivity of penalties for late payment	c) January 1, 1989 not 3rd quarter, 1988	c) January 1, 1989
2. Requiring TLA holders submit updated aerial photographs or satellite imageries	Postpone implementation until NAMRIA has the photographs which should be available by October 1988.	DENR approved postponing the implementation
3. Shipment and cutting of undersized logs	Cutting of undersized trees has always been allowed under certain conditions and no need to get permit to cut and transport	DENR allows shipment of undersized logs but only to the nearest sawmill and within the region only
4. Moratorium on transport of all wood products in Agusan del Sur and del Norte and Butuan City.	Requested DENR to expedite resolution of this serious problem	Solutions arrived at: a) task force to determine legally and illegally cut logs; b) owner of the logs to declare the volume of the illegally cut logs and to pay the fine of P500 per cubic meter; c) choke points be established at the Agusan River, National Highway, and at mill sites.
5. House Bill increasing forest charges : 1st group to P360/cu.m. and 2nd group to P260/cu.m.	Registered Opposition since TPSA will increase the share of government on actual timber cut.	Still pending at the Lower House of Congress
6. H.B. No. 21223, Ban Logging if actual forest cover falls below 40% of the total land area of the zone.	TLA'S with good track record should be exempted regardless of their geographical location	H.B. No. 21223, passed the lower House of Congress without PWPA proposal.
7. S.B. No. 917, Ban logging if actual forest falls below 40% of area of province.	Proposal as in HB No.21223	S.B. No. 917 still under hearing
8. S.B. No. 1094 Ban logging in provinces if actual forest cover is less than 50% of actual forest cover us land areas but lift logging ban if actual forest cover reaches 60% and over.	Same reason as in H.B. No. 21223.	S.B. No. 1094 still under hearing

9. DAO No. 44, Series of 1987 limiting the use of highlead gardens.	Requested reconsideration of the order as it may adversely affect operation of concerned TLA holder .	PWPA proposed guidelines in use of yarders that will minimize damage to residual trees still pending reconsideration by DENR
10. DAO No. 19, Series of 1989 Lumber export ban, effective June 30, 1989.	Several position papers were submitted and submitted to DENR requesting extension of the export of kiln-dried and surfaced lumber beyond June 30, 1989 if not their exemption from export ban.	DENR so far denied both recommendations. But PWPA is still pursuing the reconsideration by DENR .
11. DAO No. 20, Series of 1989 Revising the annual allowable Computation involving only virgin forest which, in effect, may reduce annual cut by 70 to 90 % of TLA holders	Proposed to include the residual forest in the computation as should be and proposed further a formula that will allocate proportionate years for residual and virgin forests along the principle of Sustained Yield	DENR Policy Group favors the inclusion of only 30 - year old residual forest or the use of the growth increment in the computation; however FMB Directors recommended the average actual cut for the last five years as basis of annual allowable cut.
12. Only one logging side to be operated at a given time.	Recommended operation of at least two logging sides due to : a) Peace and order situation ; b) Climatic conditions ; c) Two or more parcels which are far apart; d) Two different areas existing and supporting different plants; and e) Operating on virgin forest and residual stand already on the prescribed cutting cycle.	DENR approved recommendation but on a case-to-case basis.
13 Enhancing the image of the Wood Industry.	PWPA launched an aggressive and sustained public relations campaign to enhance the industry image and to counter bills filed in Congress adverse to the industry interest .	a) Concluded, in certain aspect, survey work to gauge perception of the general public, members of Congress, media and ordinary citizens about logging ban and/or wood industry. b)Prepared audio visual aids placed/used in different media. c)Placed general and testimonial Ads in leading national newspapers d)Graced talk shows and public fora, especially by President Antonio G. Bernas and Chairman Ernesto F. Sanvictores. e)Printed facts and figures materials about the wood industry for the information of the general public; f) Bring some invited legislators, NGOs media, high government officials , educators, etc., to concession areas to see work of TLA holders in forest conservation.

Management Committee was designated as administrator and manager of the Fund, pursuant to DENR Adm. Order No. 32, Series of 1987, as amended. The Program resulted in bringing back into the fold of the Association previous TLA holder - members as all TLA holders made possible the enlistment of new members as well as the reforestation of about 21,500 hectares (about 21 million seedlings planted) as of the year-end 1988.

The Association maintained its representation in different public and private fora in the country, ASEAN and other regional and international aggrupations. At present, PWPA holds the positions of Chairman and Secretary-General in Southeast Asia Lumber Producers Association (SEALPA) and Vice Chairman in ASEAN Panel Products Federation (APPF). The Association is also currently active in WGFAF/COFAF of ASEAN-CCI.

The Association, together with a BOI-appointed Consultant, concluded the preparation of the "Ten-Year Development Plan for the Forest-based Industry" (consisting of subsectors Wood Processing, Pulp and Paper and Forest

Plantation). The Plan underscores the necessary strategies and programs the forestry sector has to implement to effect its own growth and development.

Locally, PWPA continues to coordinate with government offices such as the Department of Environment and Natural Resources (DENR), Department of Trade and Industry (DTI), Department of Science and Technology (DOST), National Economic and Development Authority (NEDA), the Department of Energy (DOE) and the Department of Labor and Employment (DOLE). The Association maintains membership in intra-industry groups such as PCCI, COPE and ECOP.

Finally, let it be noted that your Association can only present a better image of, and effectively perform for, our industry to the extent that we, as individual members, perform as well, not only in terms of own productivity and profitability but more so in continuing commitment for, and participation in, the conservation of our forest heritage upon which the survival of our industry mainly depends.

The Board of Directors
Philippine Wood Products Association, Inc.

We have examined the balance sheets of Philippine Wood Products Association, Inc. (a nonstock, nonprofit corporation) as at December 31, 1988 and 1987, and the related statements of income and expenses and changes in financial position for the years then ended. Our examinations were made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the financial statements referred to above present fairly the financial position of Philippine Wood Products Association, Inc. as at December 31, 1988 and 1987, and its income and expenses and the changes in its financial position for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis.

PHILIPPINE WOOD PRODUCTS ASSOCIATION, INC.
(A Nonstock, Nonprofit Corporation)
NOTES TO FINANCIAL STATEMENTS

1. ORGANIZATION

The Philippine Wood Products Association, Inc. (PWPA) is an association of corporations, partnerships and individuals involved in logging, sawmilling, veneer and plywood manufacture, wood preservation, and other related activities. Incorporated as a nonstock, nonprofit corporation, the Association aims to achieve unity in the wood industry under a single integrated association that would serve as spokesman for the entire wood industry in its continuing dialogue with government authorities. Its services, programs and activities are all geared towards the promotion and development of the lumber and plywood industry.

2. DEPRECIATION POLICY

Property and equipment are carried at cost less accumulated depreciation. Depreciation is computed on the straight-line method based on the estimated useful lives of the assets ranging from 5 to 15 years.

3. ASSOCIATION'S REGIONAL CHAPTERS

The Association maintains a number of regional chapters within the Philippines. These chapters (organized during the latter part of 1979 and during 1980) act as extensions of the Association in their respective regions. Dues collected by these chapters are turned over to the Association. Twenty percent of such collections are remitted back to the chapters to cover their administrative expenses. For purposes of accounting, such amounts are treated as expenses upon receipt of the chapters' collections.

4. CHANGE IN CONCEPT OF STATEMENT OF CHANGES IN FINANCIAL POSITION

In 1988, the Association changed its presentation of the Statement of Changes in Financial Position from an analysis of the change in working capital to an analysis of the change in cash in order to more clearly reflect cash flow.

The 1987 statement has been restated to conform to this presentation.
